### IRS UNIFORM LIFETIME TABLE

To calculate RMDs, use the following formula for each account:

#### **Account Balance**

as of December 31 last year\*

#### **Life Expectancy Factor**

see the Uniform Lifetime
Table\*\* below to find the factor
using the age you turn this year

## Example

\$100,000.00

**Account Balance** 

as of December 31 last year\*

25.6

Divisor

IRA owner turned 72 this year

## **Uniform Lifetime Table**

Life Expectancy Factor

<sup>\*</sup> Adjust if you have assets that were in the process of being recharacterized, transferred or rolled over on December 31.

<sup>\*\*</sup> The Uniform Lifetime Table can be used by all IRA owners, unless their sole beneficiary for the entire year is their spouse who is more than 10 years younger. In that case, the regular Joint Life Expectancy Table is used, which could reduce the RMD even further.
